Amendments to the Abstract:

Please substitute the following version of the Abstract, with changes shown by strikethrough (for deletions) or underlining (for added matter).

ABSTRACT OF THE DISCLOSURE

A jackpot system ~~used in casinos~~ for allowing the wins from at least one jackpot to players playing at a plurality of gaming positions. ~~The gaming positions are~~ associated with a computer network including a computing engine having a memory for receiving inputs from the gaming positions and at least one output for communicating information to the players. ~~At least one~~ <u>A</u> paytable is stored in ~~that memory or in another~~ <u>a</u> memory associated with the computer network. ~~The paytable can be,~~ <u>is</u> configured by an operator, and has a plurality of possible winning entries and ~~wins~~ associated ~~with the winning entries~~ <u>wins</u>. A selection generator is triggered at least once~~, via the computer network,~~ by ~~a trigger~~ <u>an</u> input ~~generated~~ in response to the playing of each game of a group of selected games to generate a selection. The selection is compared with the paytable, and if ~~the selection~~ <u>it</u> corresponds to a winning entry, the associated win is transferred to at least one player associated with the gaming position which triggered the selection, and/or to another jackpot.
